

# Nils Nordin

I am just 25 and still have over 7 years of experience working as a developer, both back- and front-end, and in most programming languages. I have produced both web based solutions, custom software, and I have been creating mobile applications for Android/iOS since the launch of Smartphones. As the IT landscape changes rapidly, I change with it. I strive towards creating better user experience, seeking new challenges and developing through new encounters.

## Education

Computer Engineering

*2013 to 2015*

Linköpings Tekniska Högskola

## Experience

IT Consultant, Friendsip AB

*2018 to present*

Co-founded Friendsip AB 2018 with the ambition to utilise the broad spectrum of competence within digital communication to contribute to the growing need among businesses. During the spring of 2018 I have taken on several employments, heading projects and creating everything from mobile applications to web based solutions.

Head of development, Vink

*2016 to 2018*

Co-founded and headed the development of the mobile application of Vink. It is a social engaging platform for meeting new people, containing several thousand users and still growing. The work included everything from programming, graphic and animation design, to heading the development team.

Head of development, TaxiCaller Nordic AB

*2015 to 2017*

Lead the development of the IT coordination and communication solution TaxiCaller. Developed the iOS version throughout my employment but rose to become head of development, as well as being project leader for several projects and scrum master.

CTO & Developer, Cossaro Software AB

*2014 to 2016*

Headed the development of the application Tripster. Coded my way through several languages as well as creating all the graphical content.
